

PATRICIA L. ENG, P.E.

Patricia L. Eng, P.E., is NRC's Senior Advisor for Knowledge Management. She manages the development and deployment of initiatives to collect, capture and categorize knowledge from agency subject matter experts and make this information available to the right person when it is needed. She works with agency executives and staff to identify areas of highest knowledge risk, develop methods to address these areas, and makes this information available to all agency staff through the NRC Knowledge Center, a system of electronic communities of practices.

In addition to her 27+ years at NRC, Ms Eng has worked at NASA, Garrett AiResearch and Westinghouse Hanford. She served on the Board of Directors of the Society of Women Engineers for 4 years and on the National Academy of Engineering's Celebration of Women in Engineering Committee. Ms Eng hold a degree in nuclear engineering from the University of Illinois, holds a professional Mechanical Engineering license and expects to earn her Master's degree in Science and Technology Studies from Virginia Tech in the spring of 2011.
