

NIC to co-host April 13th (4:30 P.M. EST) TradeTheNews.com Roundtable Webinar Series on U.S. New Nuclear Energy (complimentary registration information below)

TradeTheNews.com Roundtable Series

Outlook for New U.S. Nuclear Energy:
Political, Regulatory and Economic Dynamics

Tuesday, April 13, 2010 -- 4:30 pm to 5:30 P.M. EST

WASHINGTON DC -- The United States Nuclear Infrastructure Council (NIC), a leading think tank advocate for new nuclear energy, will join TradeTheNews.com, a Wall Street-based innovator in real-time breaking financial news, analysis and trade ideas, in presenting an April 13, 2010 (4:30 pm - 5:30 p.m. EST) webinar on the outlook for new U.S nuclear energy in the context of recent White House initiatives to expand nuclear energy generation. Registration for the hour-long webinar discussion is available through the TradeTheNews.com Roundtable Series link -- <https://www1.gotomeeting.com/register/234067512>.

Webinar discussion topics include the status of "early movers", leading technology options, key players in the nuclear marketplace as well as critical hurdles to new nuclear generation including the impasse over the Yucca Mountain (Nevada) nuclear repository.

Established in 1999, TradeTheNews.com is the financial professional's source for instant Stock, Futures, Forex and Credit news analysis. Breaking news is delivered via live squawk and streaming headlines. TradeTheNews.com's broadcasters and editors are professional analysts, CFA Charter Holders, and former portfolio managers who report and analyze free of conflict, quota, or bias 24 hours a day. This international team of analysts instantly delivers breaking market news at unrivaled speeds, distilling over 200,000 headlines and reporting only events that will impact the equity, commodities and currency markets across the globe. Clients hear and see breaking market news, analysis, comparisons, and market wisdom in real-time as it occurs.

C.J. Milmoie, Senior Policy Counsel, U.S. Nuclear Infrastructure Council & Former Counsel, General Electric Robert S. Walker, MPR Associates & Former President, Constellation Nuclear Services

President Obama recently called for expansion of nuclear energy generation in the United States while announcing the first in a series of loan guarantees -- an \$8.7 billion guarantee for two new units at the Vogtle plant in Georgia. The President's Fiscal Year 2011 budget request proposes expanding the Energy Policy Act of 2005 loan guarantee program to \$54 billion. There are eighteen applications received by the U.S. Nuclear Regulatory Commission for 28 new nuclear reactors. Additionally, four new nuclear fuel enrichment facilities are either under construction or planned along with initiatives for at least two new major manufacturing facilities to provide nuclear plant components. This revival comes amidst a global nuclear renaissance with more than 50 plants under construction and up to 400 on the drawing boards -- boosted by electricity demand in emerging nations and global climate objectives. Senators Kerry (D-MA), Lieberman (I-CT) and Graham (R-SC) are planning to introduce a revamped bipartisan U.S. climate change legislative approach this Spring that embraces a robust nuclear energy platform.

Webinar discussion topics include the status of "early movers", leading technology options, key players in the nuclear marketplace as well as critical hurdles to new nuclear generation including the impasse over the Yucca Mountain (Nevada) nuclear repository.
